

PRODUCT SHEET:

RAMPTECH LAVATORY RINSE / FILL COUPLINGS

**Quick connect with no drips.
Absolutely, positively.**

Superbly engineered RAMPTECH® Lavatory Rinse/Fill Couplings attach rapidly to any standard 1inch rinse/fill nipple for a no-drip connection between a ground service vehicle and the aircraft lavatory system during servicing. Open end, quarter turn lock-and-release design provides quick connect and disconnect to enhance speed and efficiency on a busy ramp while positive snap lock assures leak-proof sealing.

RAMPTECH® Lavatory Rinse/Fill Couplings are made of lightweight and rugged anodized aluminum and these couplings are designed for a wide temperature range. Other top quality features include knurled body for improved handling, a high operating pressure rating with low pressure drop and a robust hose bib that accepts a standard 1inch ground servicing hose/clamp connection.

Sage
Part Number 383030

FEATURES

- ✓ Distinctive quick connect/disconnect with positive snap lock
- ✓ Wide temperature range
- ✓ Positive leak-proof sealing on all standard 1 inch lavatory rinse/fill service panel nipples
- ✓ Open end, quarter-turn to lock and release
- ✓ Lightweight/rugged anodized aluminum construction
- ✓ Knurled body for improved handling
- ✓ Hose bib to accept standard 1 inch ground servicing hose/clamp connection
- ✓ High operating pressure rating with low pressure drop
